

Medicinal plants and EAV

This scientific paper is the result of a 100% independent research. You can facilitate the independent research and promotion of EAV, particularly the [medical plant project](#).

The listed medicinal plants correspond to these of the Swiss IKS Lists B–E of the Intercantonal Convention on the Control of Medicines, the Pharmacopoeias DAB 8, ÖAB, Ph.Eur, Ph.Helv.VI, Ph. Franç. 9, 10 and publications of forensic medicine and toxicology (with officinal plants from Algeria, Belgium, Bulgaria, Canada, Chile, China, Gabon, Great Britain, India, Italy, Japan, Korea, Mexico, Poland, Russia, USA, Venezuela).

These listed medicinal plants guarantee a safe start with the combination EAV & phytotherapy. They are by far not so many as have been inventoried yet (about 12'000 in Penso, G., Index plantarum medicinalium totius mundi eorumque synonymorum, Milano, OEMF) or worldwide estimated by the WHO (about 20'000).

Abies alba	Ge, Kr, Ne B, Lu	(1)
Abies balsamea	Lu	(1)
Abies sibirica	Ge, Kr, Ne B, Lu	(1)
Acacia senegal, vereck	Bi D	(1)
